

Name: _____

Reproduction Leads to the Variety of Life

Biology Learning Guide 4 - Science 9

Asexual reproduction:

| | |
|---------------------------------------|--------------------------------|
| Advantages: 1: 2: 3: | Disadvantages: 1: 2: |
|---------------------------------------|--------------------------------|

Sexual reproduction:

| | |
|------------|--|
| Advantage: | Disadvantages: 1: 2: 3: 4: |
|------------|--|

Give 4 specific examples from the above.
Ie Sexual / Asexual with Advantage / Disadvantage

Look up 3 different types of animals (mammal, fish, lizard, bird, insect, etc...) and explain how they reproduce. Use as many of the terms as possible from this unit for each. Things to include Sexual/Asexual, how fertilization happens, where the eggs are, how the sperm reach the egg, how the young gain nutrients, genetic diversity, etc...

Animal 1

Animal 2

Animal 3
